PROJECTS

Canadian Data Science Jobs Analysis | [GitHub](#)

- Data analysts, business analysts, and general analysts 10x more in demand than data engineers and data scientists
- Across all web platforms there is a 10x demand for senior roles than middle and entry-level roles
- Average salary for a data science career in Canada can range from 65k to 85k
- About 50% of all job postings are expecting candidates to have experience in SQL querying

Social Media Sentiments Analysis | [GitHub](#)

- Detected a 2 to 1 ratio in user likes to reshares and forecasted periods of high user activity at 2 pm on multiple timeframes
- Discovered a 100% increase in post 'likes' in comparison to post 'reshares' across all platforms
- Observed posts with negative sentiment received 20% fewer likes and reshares than other sentiment posts on all platforms

Fast Food Marketing Campaign A/B Test | [GitHub](#)

- Established a hypothesis and 3 parameters for events in which to reject the hypothesis
- Administered an ANOVA test to test and compare 2+ different marketing campaigns to find the financially favorable campaigns
- Identified top 2 marketing campaigns that can be utilized

Secondary Market Automobile Sales Analysis | [GitHub](#) | [Web App](#)

- Designed API with 7 different metrics visuals derived from the 5 most observed consumer questions when purchasing a vehicle
- Structured the web application interface to a minimalistic diagram for ease of user understanding across all demographics
- Constructed a customer interactive segment to compare 2 car manufacturers to enhance customer engagement on the app

WORKING EXPERIENCE

Self-Employed

Remote

Freelance Data Analyst

May 2024 – Current
